PROFILE

Product Designer with 4+ years of experience designing enterprise B2B SaaS and AI-powered automation workflows. Currently pursuing a Master's in Human-Centered Interaction Design, deepening my practice in research-led design, interaction systems, and platform-scale problem solving.

WORK EXPERIENCE

Automation Anywhere- UX Designer

March 2021 – July 2025 | Bangalore, India

- Designed **macOS automation** experiences for Apple Keynote & Numbers that enable users to build workflows to create, edit, and format presentations and spreadsheets.
- Designed **GenAI Studio** from its earliest concept stage, enabling users to build and optimize **automation workflows** using AI-powered **prompt templates** and model insights across a platform executing **400M+ automations annually**.
- Improved enterprise **governance** workflows by designing experiences for role-based access control (RBAC), audit trails, and data masking to support security and compliance needs.
- Contributed **new components, icons**, and enhanced property-panel patterns to the DesignOps team as part of the **Rio Design system**, improving consistency and scalability across products.
- Designed Automation Anywhere **Community** and **University** experiences to grow product learning and engagement, contributing to **63% engagement** across growth accounts.
Transitioned product learning from an à la carte model to a guided journey, increasing course and content consumption among enterprise users.
