

Sonal Soni

Product Designer

San Francisco, CA | +1(415) 205-2403 | Soni7sonal@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Product Designer with a computer science background and **5 years** across AI products, agent workflows, and enterprise **B2B SaaS**. I design low-code AI tools for non-technical users, prototype in code, and own problems from definition through launch. **MDes in Human-Centered Interaction Design, CCA.**

WORK EXPERIENCE

Automation Anywhere | UX Designer

March 2021 – July 2025

- Designed **GenAI Studio** from 0 to 1, an AI workspace where enterprise users build, test, and improve automation workflows using prompt templates and model insights. Shipped features that made user workflows **35%** more efficient on a platform running **400M+ automations** a year.
- Designed the **AI governance layer**: a policy builder that lets admins mask PII, PHI, and PCI in prompts, with a live preview showing exactly what the model would receive.
- Built the **compliance dashboard** for tracking policy violations, masked-data events, and model usage across vendors, with a session-ID audit trail making every prompt traceable.
- Ran **user interviews and field research** to learn how people actually work, then turned those findings into clear design direction and product strategy for **3+ product areas**.
- Designed and shipped **macOS automation** for Apple Keynote and Numbers. Owned scope, interaction patterns, and launch; the work became core to how the platform extends to new apps.
- Contributed** components, icons, and property-panel patterns to the **Rio design system**, improving consistency across products and helping teams build faster.
- Redesigned the **Community and University** learning experiences, using product analytics and user feedback to guide decisions. Course consumption rose **63%** among enterprise users.

PROJECTS

MarrowMatch

Shipped MarrowMatch, an AI agent for the national bone marrow registry, from systems research to live product: causal loop mapping, service design, conversational UX. (React, Vercel, GA4)

Aquasition

Water conservation card game selected for the Figma Config 2026 scholarship. Reframed the core mechanic from collectible tokens to a penalty meter after playtests showed players gaming the incentive backwards.

Just Landed

Researched, hosted, and tested a real event for people new to a city, then packaged it into a free kit so others could host their own.

EDUCATION

Master of Design (MDes), Human-Centered Interaction Design California College of the Arts, San Francisco, CA	<i>Aug 2025 – Aug 2026</i>
Post Graduate Diploma, Design & Innovation Indian School of Design & Innovation, Parsons	<i>Aug 2019 – Jul 2020</i>
Bachelor of Engineering, Computer Science Engineering Mody University of Science and Technology	<i>Aug 2015 – May 2019</i>

SKILLS

Tools: Figma, Claude, Claude Code, Cursor, Miro, Jira, Confluence, Pendo, UserTesting, Quip
Build: HTML, CSS, React, Git/GitHub
Research: User Interviews, Usability Testing, Qualitative & Quantitative Research, Heuristic Evaluation, Survey Design, Synthesis, Information Architecture, Contextual Inquiry, Affinity Mapping, Personas & Archetypes, Product Analytics
Design: Interaction Design, UX Strategy, Human-AI Workflow Design, Governance UX (RBAC, Audit Trails, Data Masking), Design Systems, Wireframing, Prototyping, Accessibility-aware Design, Cross-Platform Experiences, Service Design Thinking, Human-Centered Systems, End-to-End Experience Mapping
